Press Release

FrostByte Video, Inc. and Schweitzer Mountain Resort's Stomp Games '08 a major success for automated video system

Slopestyle participants amongst first to experience Automated Personal Action Video system on the mountain

April 29, 2008 - San Diego, CA, FrostByte Video, Inc., the inventor of Automated Personal Action Video technology that tracks skiers and boarders on runs and terrain parks and automatically produces DVDs and streaming videos of individual skiers and riders, installed a temporary version of its video system for the 2008 Stomp Games hosted at Schweitzer Mountain Resort in Sandpoint, Idaho. The Stomp Games was host to over 300 skiers and riders competing in slopestyle, ridercross and rail jam competitions and the FrostByte Video system was setup to catch all of the weekend's action on the slopestyle course.

FrostByte Video used this weekend event to prove the viability of its system in rugged mountain conditions as well as to demonstrate the driving customer demand for this product at ski resorts in general. Leveraging the opportunity to expose the product to so many customers throughout the course of the weekend long event, FrostByte Video was able to extensively test the robustness of the technology and its implementation. According to Rick Korfin, FrostByte Video CEO, "The weekend's events went smoothly and the FrostByte Video system operated without flaw during the course of the event." Tom Chasse, Schweitzer General Manager & CEO, said, "I think you have a good product with great potential. We certainly appreciate your efforts to get up and running during the Stomp Games – you've proven that there is a market for the product."

FrostByte Video is a revolutionary new technology solution that merges digital video recording, online video streaming, DVD production, GPS tracking and snow sports to create an amazing souvenir. Using preset cameras on ski runs and terrain parks, the streaming video footage from multiple cameras

more

is combined with the skier's location information from a tracking armband to automatically create a video that is made unique to each customer using only video clips of his/her skiing or riding. The video is then finished off by adding scene transition effects and background music of the customer's choosing. FrostByte Video's unique and innovative technology is currently patent pending.

About FrostByte Video, Inc.

FrostByte Video is a leading edge, technology development company creating products for the action sports communities. Its first product on the market uses patent-pending technology to track skiers and automatically produce DVDs of their day on the slopes. .
